

@SpringBootApplication(scanBasePackages = {"ins.platform"})

scanBasePackages是什么意思

@EnableFeignClients 客户端注解

```
@EnableDiscoveryClient
@SpringBootApplication(scanBasePackages = {"ins.platform"})
@EnableCircuitBreaker
@EnableFeignClients
@EnableAsync
@EnableTransactionManagement
public class PrpallApplication extends SpringBootServletInitializer implements WebAp
    @Override
    protected SpringApplicationBuilder configure(SpringApplicationBuilder application)
    {
        return application.sources(PrpallApplication.class);
    }

    public static void main(String[] args) { SpringApplication.run(PrpallApplication.
}
```

bean

bean1
